To: Diana Day
Vision Management

Dear Diana,

I want to give you some statistics and wish I could be at the inservice tomorrow to talk with you about our amazing results. I think you will be impressed with the gains that we have made in discipline management, especially when you look at it longitudinally over a three year span, before and after Vision Management©.

A reduction of referrals from 2531 to 962! That is impressive in anybody's books. Thanks for you help with this. Looking at our Spring Semester last year we had 1,139 referrals, after implementing your Vision Management program and obtaining staff buy in... wait for staff to consistently use the program...we only had 524 referrals!!! That is a greater than 50% reduction.

I attached copies of the raw data for you to look over. Hopefully, we will make one of your updated slide shows. Take a look at the charts and I will see you Wednesday to go over them with you.

I think you also had a very positive effect on our scores. You not only assisted us with management of severe and persistent misbehavior but also taught staff the skills to motivate our students by using the goal-setting. The techniques you demonstrated to get students to work together and use higher order thinking benefited our students during state testing.

Thanks for all of your advice and help this last school year. Your program has made a difference here at Lee Middle School!

Sincerely,

Jay Law
Lee Middle School
